

FITRADERS

TRENDLINES

TRENDLINES

- Trend lines need 3 or more touches to become valid
- An active Trend line will act as an entry and exit signal
- When breached they will then work in the opposite direction/ support and Resistance
- Trend lines can for chart patterns when you find multiple Trend lines working in Unison
- A Trend line works when you identify traders/Algos all reacting to the same trend
- Trend lines are used for Pivot point in a chart
- Entry and Exit Signals
